

DL x DC - av x sp

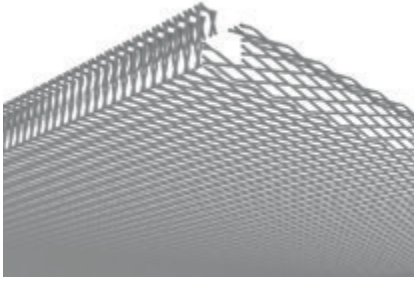

DL = Yatay Genişlik
DC = Dikey Genişlik
av = Hadve Genişliği
sp = Malzeme Kalınlığı

DL = Horizontal Width
DC = Vertical Width
av = Strand Width
sp = Material Thickness

R: Baklava Mesh Tipi
Q: Eşkenar Dörtgen Mesh Tipi
E: Hexagonal Mesh Tipi

R: Diamond-Shaped Mesh Type
Q: Rhombus Mesh Type
E: Hexagonal Mesh Type

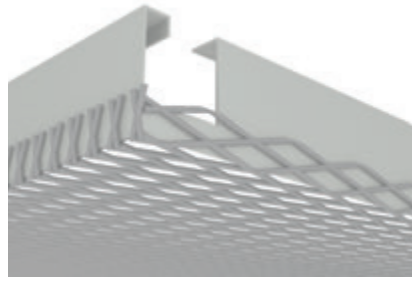

A TİPİ TYPE A

Expanded plakaların bükülerek panel oluşturulmuş tipidir. Bordürsüz panellerdir.

This type is when expanded panels themselves are bent without the use of any profile.

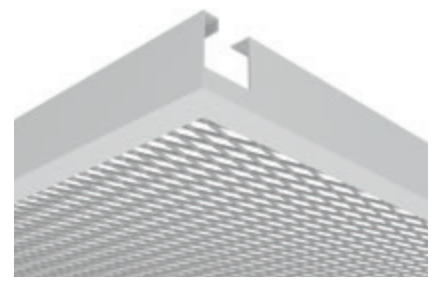

B TİPİ TYPE B

Expanded plakaların bükülüp, içine profil kaynatılmış tipleridir. Bordürsüz panellerdir.

This type is when edge profiles are welded onto the bent edges of the expanded plate from inside.

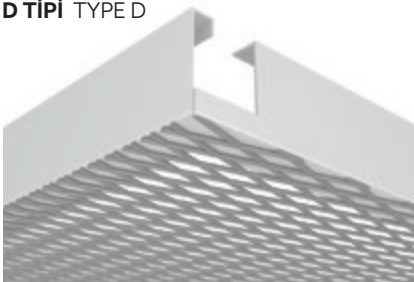

C TİPİ TYPE C

Plank panelden oluşturulan çerçeveye expanded levhanın üstten (içerden) kaynaklanması ile oluşturulan panel tipidir. Bordürlü panellerdir.

This type is when frame, which is made from one piece cut-out plank panel, is welded onto the expanded plate from below.

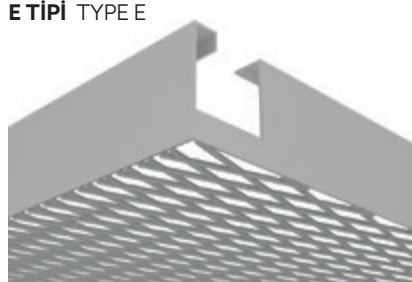

D TİPİ TYPE D

Plank panelden oluşturulan çerçeveye expanded levhanın alttan kaynaklanması ile oluşturulan panel tipidir. Bordürlü panellerdir.

This type is when frame, which is made from one piece cut-out plank panel, is welded onto the expanded plate from above.

E TİPİ TYPE E

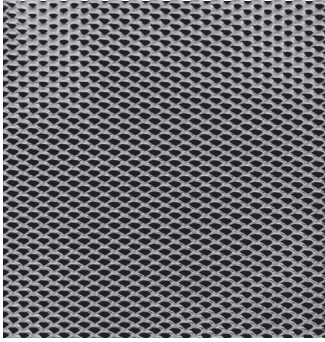

Oluşturulan çerçeveye bükümsüz expanded levhanın alttan kaynaklanması ile oluşturulan panel tipidir.

This type is when frame is welded on the expanded panel from the edges. Expanded which is made from plate and frame does not have any bent edges.

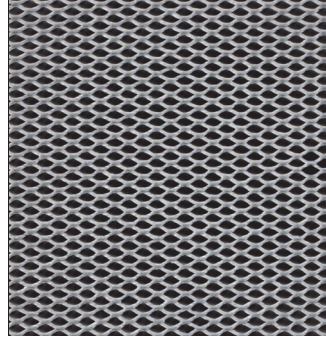

Hammadde olarak galvanize çelik ve alüminyum kullanılır.
Raw materials can be galvanized steel and aluminium.

Örnekleme Hook-on panel olarak yapılmıştır.
Pictures represent hook-on panels.
